Response to Arguments

Applicant's arguments with respect to claims 1-23 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-12 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The independent claim 1 recites the limitation "the method" in line 2, of the claim 1. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-23 are rejected under 35 U.S.C. 102(b) as being anticipated by Buxton et al. 6,115,025, hereinafter refer as Buxton.

1. Claim 1,

Art Unit: 2628

As per claim 1, "A graphical user interface displayed on a display and comprising a first part and a second part, the method comprising:" The preamble of the claim defines broadly a graphical user interface, Buxton in figs. 3a and 3b clearly illustrates two parts 34 and 30.

The second part of the claim defines: "the first part element is automatically reoriented relative to the display in accordance with a change to orientation/location information;" Buxton in fig. 3b illustrates the claim limitations. The following step of the claim invention "allowing the second interface part to remain in a same orientation relative to the display regardless of the change to the orientation/location information." Discloses by Buxton in fig. 3 and see col. 4 lines 26-55.

2. Claim 2,

A method according to claim 2, wherein the first part is a first user interface element and the second part is a second user interface element. Buxton at col. 4, line 30 teaches the claim limitations.

3. Claim 3,

A method according to claim 2, wherein a user explicitly determines the change to the orientation/location information. Buxton in fig. 6 step 86 teaches the claim limitation.

4. Claim 4,

A method according to claim 3, wherein the explicit determination comprises the user interactively inputting information that indicates an orientation. Buxton in fig. 6 step 86 teaches the claim limitation.

5. Claim 5,

A method according to claim 2, wherein the change to the orientation/location information is determined automatically based on a spatial orientation/location change relative to the display. The rejection of this claim is similar to the rejection of claim 1.

6. Claim 6,

A method according to claim 5, wherein the automatic determination comprises at least one of sensing the orientation of an input device, sensing the orientation/location of a user, automatically identifying an identify of a user. Buxton in fig. 6 step 88, and in fig. 7 steps 112, 120 teaches the claim limitations.

7. Claims 7-12,

In view of following claims' limitations, it is not necessary to repeat, the rejection of claims 1-6 applies to rejection of claims 7-12.

8. Claims 13-23,

Claim 13 recites " a user interface used by a plurality of users," and the next part of the claim recites, " determining which one of the users is interacting with the user interface". Buxton at col. 3, lines 4-5 explicitly specify the claim limitation. In view of following claims' limitations, it is not necessary to repeat the teachings of the reference; therefore, the rejection of claims 1-6 applies to rejection of claims 13-23.
